

Sirs:

I am strongly opposed to Broadband over Power Line (BPL).

I believe that the potential for interference is incredible and anyone with a power line in his backyard will no longer be able to listen to SW broadcasts or operate in the HF or lower VHF portions of the Amateur service. The FCC should not succumb to big-money special interest groups and protect the radio spectrum instead of selling it off to the highest bidder. The FCC should be the "protector" of the precious RF spectrum resource instead of a "clear-cutting" auctioneer. Please vote NO to BPL!

Thank you,

John Ainsworth
